

That Hit the Spot 2023: ADR Series Part 2

John R. Hollenbeck, Associate Dean for Research and Natalie DeVolder, Research Administrator

The current Strategic Plan for Research and Scholarship highlighted a new journal list for the College and Units. The new list recognizes the importance of journals listed on the Financial Times 50 (FT) because the college is annually ranked on this widely cited list. Many of the journals on the FT50 list are strategic priorities for both the College and the Units. We have labeled this set of journals FT*.

Although the new list recognizes the importance of the Financial Times 50 (FT) list, some highly rated journals that are a strategic priority for the Units are not on the FT list. Because of their strategic priority to the Units, publications in these journals remain a high priority -- second only to the journals that are a strategic priority for both the College and the Units (FT*). We have labeled this second tier of journals NFT*.

Publications in journals strategically important to both the College and Units (FT*) for the period of January 1 through December 31, 2023, were highlighted in Part 1 of this series.

Part 2 of this series recognizes publications that “Hit the Spot” on the NFT* and FT list for the period between January 1 through December 31, 2023, according to the Web of Science. In terms of trends, we had 10 publications in these categories this year, down from 19 last year.
