

Off to a Good Start 2023: ADR Series Part 4

John R. Hollenbeck, Associate Dean for Research and Natalie DeVolder, Research Manager

Although publications and citations are clearly signs of research accomplishment, training future research scholars is fundamental to the intellectual mission of the college. Thus, as part of the process of expanding what constitutes evidence for research accomplishment, the current Strategic Plan for Research and Scholarship emphasizes the contributions made by our faculty toward doctoral education. The faculty cited below chaired the dissertation committee of doctoral students who matriculated in 2023. Students who matriculated in 2022 but were not recognized in last year's PhD placement announcement are included as well. The included faculty are shaping the future of the field while simultaneously advancing the careers of our students. This is especially evident when this translates into Ph.D. placements at Carnegie R1 Research Institutions. In terms of trends, the school had 4 R1 placements this year, down from 8 last year.
