

## Funding the Future 2023: ADR Series Part 6

John R. Hollenbeck, Associate Dean for Research and Natalie DeVolder, Research Administrator

External research funding is critical to the strategic plan of Michigan State University, and the business school is increasingly expected to play a role in both leading and supporting large scale funded research projects. This funding also helps support faculty via summer salary and course buyouts, doctoral students via stipends and travel, and overhead support to both the college and units.

Accepted proposals have passed an additional layer of peer review that is direct evidence of research accomplishment, and in most cases, supports future publications, citations, and doctoral student placements. Thus, as part of the plan to expand the evidence of what constitutes research accomplishment, the current Strategic Plan for Research and Scholarship recognizes the following faculty members who, according to the Office of Sponsored Programs, had active funding of \$50,000 or more (relative to their effort on the project team) during the recently completed fiscal year (July 1, 2023 – June 30, 2024). In terms of trends, we had 7 faculty with this level of funded activity, up from 5 last year.

- **John Hollenbeck**, funded by the Army Research Institute and the Office of Naval Research
- **Frederick P. Morgeson**, funded by the Army Research Institute
- **Sriram Narayanan**, funded by the National Science Foundation
- **Brian Pentland**, funded by the National Science Foundation
- **Quinetta Roberson**, funded by the National Science Foundation
- **Anjana Susarla**, funded by the National Institute of Health
- **Judy Whipple**, funded by the National Institute of Food & Agriculture

Also, as an addendum to our last “Guardian of the Gates” part of the series, we should note that Anjana Susarla served as the Associate Editor of *Information Systems Research* in 2023.
